

## HELPFUL HINTS BEFORE BOOKING A SOLAR HOT WATER REPAIR

- Ask your tenant for a photo of the solar controller. This is important because it is common for different brands of systems to have multiple types of controllers. The controller is mounted near the pump. If we know the controller, we know what parts to use and we can normally tell you what it will need over the phone.
- Ask your tenant to take a photo of the tank and installation and email it to you.
- Visit our website [www.solarhotwaterrepairsqld.com.au](http://www.solarhotwaterrepairsqld.com.au) and go to our manufacturers page. Here you will find manuals on the system and information that may be helpful in minimising your solar hot water repair.
- Ask the tenant if their booster has been turned on so they have hot water until a repair agent can fix their system.

## SOLAR HOT WATER

REPLACEMENT PARTS  
& REPAIR SPECIALISTS

## ABOUT US

Solar Hot Water Repairs QLD specialises in hot water and solar hot water repairs and maintenance. This is all we do and have done for the last ten years. Our trucks carry a full range of replacement parts for any solar hot water system. This allows us to fix solar hot water systems quickly and at the lowest possible price. You make the call and we are on the door ready to fix your broken down solar hot water system.

## PRICING

We have tailored our solar hot water and hot water repair business to suit the needs and requirements for all aspects of property management. Our billing structure is simple. Replacement components and repairs are billed from a fixed schedule of rates that has been calculated to suit every client. This way you know what the costs are upfront and there are no hidden surprises.

## STOCK ON HAND

We specialise in supplying solar hot water replacement parts on a national level, as well as installations and repairs of solar hot water systems locally. This means we can achieve the lowest level of pricing possible. It also makes property management easy when it comes to solar hot water repairs. We can receive the call and give you the options with fixed price repairs to do the job.
